TASKBOARD: UNILINKHUB

Product Backlog	In Progress	Completed
Planning and research of Business Proposal Sprint 1 • Identify a problem to solve • Validate the problem with evidence • Research on the business idea for the problem • Create a plan for the solution	- Identifying a problem in a community - Validating that problem by conducting interviews and creating surveys - Creating a detailed document of the business idea - Creating a presentation of the evidence that we got	✓ Completed ✓ Completed ✓ Completed ✓ Completed
System Design Sprint 2 • Create an ERD for the design • Create Wireframes for the design • Plan an Environment setup for the idea	- Making sure the connectivity is clear within the system - Making sure the design is clear and resembles what we trying to achieve	✓ Completed ✓ Completed ✓ Completed ✓ Completed
Create Tech Stack System Sprint 3 • Code Frontend Web App • Code Backend Spring Boot Application • Create a database for the system	- Creating a platform that is user free to all buyers and sellers - Creating a Spring boot application that is efficient to our idea - Setting up a good database to withhold all data being processed	✓ Completed ✓ Completed ✓ Completed
Complete Project Sprint 4 • Link the Frontend to the Backend Application • Connect the database to the system • Test the system • Deployment of the project	- Making sure when running the server, the whole system is linked together - Making sure the database is linked and processing all data that is needed - When using the system need to make sure it is user-friendly and functional	✓ Completed ✓ Completed ✓ Completed

WALKTHROUGH

1. What do we need to do to advance this piece of work?	• Work together and complete every task that is needed for this project. • Collect as much information as we can to prove that our project can be a success.

	• Always find ways to improve our business idea.
2. Is anyone working on anything that is not on the board?	• No, the work that has been detailed to do is divided amongst the whole team
3. What do we need to finish as a team?	• Creating a document detailing our business idea • Creating a pdf to do a presentation about our solution • Coding the system • Testing the system • Deploying the project
4. Are there any bottlenecks or blockers to the flow of work?	• No, everyone is working together to try and complete our work on time

LOGBOOK

Month:		
July	1. What did I complete since the last standup?	• Coming up with a business Idea to solve a problem • Documenting the details of our business idea to resolve the problem • Creatin a presentation document of our solution to present
	2. What am I planning to complete between now and the next standup?	• Create an ERD for the system • Create Wireframes for the project • Plan an environment setup for our project
	3. What are my impediments (or risks or problems)?	• Our project might not be a success due to environment issues we came across • There is a risk of not solving the problem if we don't succeed

Month:		
August	1. What did I complete since the last standup?	• Created an ERD for the system • Created Wireframes for the project • Created a document detailing the business setup of the environment
	2. What am I planning to complete between now and the next standup?	• Coding the Frontend web app • Coding the Backend spring boot application • Create a database for the system

	3. What are my impediments (or risks or problems)?	• Our ERD might not be a good structure for our project and might not be clear on our everything is linked • Our design of our project might not attract our client like we wanted to

Month:		
September	1. What did I complete since the last standup?	• Coded the Frontend web app • Coded the Backend spring boot application • Created a database for our system
	2. What am I planning to complete between now and the next standup?	• Link the Frontend web app to the Backend spring boot application • Connect the database to the system • Testing the system and making sure it works • Deploying the system if its ready
	3. What are my impediments (or risks or problems)?	• As a team we might get errors while building the system • As a team we might get issues putting our work together

Month:		
October	1. What did I complete since the last standup?	• Connected the Frontend web app to the Backend spring boot application • Connected the database to the system • Testin the system • Deploying the system
	2. What am I planning to complete between now and the next standup?	• The project is completed so the business platform should be available for everyone to conduct their business. As a team wat to do next is to manage the system and advertise it
	3. What are my impediments (or risks or problems)?	• The system might crash while we have clients conducting their business on the platform • It might be difficult for our users to navigate through the system`
